

An Internship Report
Of
Virtual Works Internship

Submitted

To

School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech (Computer Science and Engineering)

By

Roll Number of Student -

25SCS1003004502

Name of Student: Chaitanya Jain

Batch: 2025-2029

CANDIDATE'S DECLARATION

I, CHAITANYA JAIN, do hereby declare that the internship report titled “Virtual Works Internship” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering. All the references have been quoted and I have not taken as such any material from any other source. I affirm that this report is my own and has not been submitted to any other institute for any degree/diploma requirement, and further I shall be solely responsible for any kind of copyright violation in this regard.

Signature:-

Student Name: Chaitanya Jain

Roll No.: 25SCS1003004502

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I would like to thank the Virtual Works-lab team, for providing me the opportunity and the structured platform to learn and gain hands-on exposure in the domain of UI/UX. I am also thankful to my institute, IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering for their continuous support and encouragement.

I express my gratitude to my parents for their blessings.

Signature:-

Student Name: Chaitanya Jain

Roll No.: 25SCS1003004502

To,
Chaitanyajain
IILM UNIVERSITY

Date: 30 July 2026
Ref: VWX-AUG26TOSEP26-571

OFFER LETTER: UI/UX

Dear Chaitanyajain,

Congratulations! We are thrilled to officially offer you an internship position as a UI/UX at VirtualWorks by Noivrn.

During our selection process, your skills, enthusiasm, and technical aptitude stood out. We believe your background will be a fantastic addition to our team, and we are excited to see the innovative ideas you will bring to our upcoming projects.

ROLE DETAILS

Position: UI/UX
Duration: 30/07/2026 to 29/08/2026
Mode: Remote

EXPECTATIONS

- Complete assigned tasks
- Maintain high quality
- Adhere to deadlines

At VirtualWorks, we are committed to fostering innovation and providing our interns with hands-on experience in building real-world solutions. You will collaborate with our core team, expand your technical skill set, and contribute to impactful projects.

We are incredibly excited to welcome you to Team Noivrn!

Utkarsh Mishra

CHRO

4. PROJECT DESCRIPTION

4.1 Introduction

This report presents a detailed account of the **UI/UX Design Internship** completed at **Virtual Works** as part of the Bachelor of Technology in Computer Science and Engineering program at IILM University.

The internship was designed to provide practical exposure to the principles and processes involved in designing effective digital interfaces. During the internship, I worked on multiple UI/UX-oriented assignments involving website redesign, mobile application interface design, website wireframing, UX case-study analysis, and landing-page design.

The internship primarily focused on understanding how users interact with digital products and how design decisions involving layout, navigation, typography, spacing, visual hierarchy, and usability can improve the overall user experience.

The practical work was primarily design-oriented and involved the use of **Figma** to create and organize interface designs.

.

4.2 Organization Profile

Virtual Works provided the platform and structured tasks through which I gained practical exposure to UI/UX design during the internship.

The internship focused on developing an understanding of modern digital interface design and user-experience principles through practical assignments.

The work environment enabled me to work on different types of design problems, ranging from improving existing website interfaces to creating mobile application screens, developing wireframes, analyzing usability, and designing landing pages.

The internship emphasized practical application of design concepts rather than only theoretical learning..

4.3 Problem Statement

Modern websites and mobile applications need to be easy to understand, visually consistent, and intuitive to use. Poor layout, confusing navigation, inconsistent spacing, weak visual hierarchy, and unclear interaction patterns can negatively affect the user's experience.

The primary problem addressed during this internship was to understand and apply UI/UX principles to create interfaces that are **clear, visually appealing, consistent, accessible, and user-friendly**.

The internship involved analyzing existing interfaces, identifying design and usability issues, planning layouts through wireframes, and creating improved interface designs.

4.4 Project Objectives

The major objectives of the internship were:

- To understand fundamental UI/UX design principles.
- To develop practical experience with **Figma**.
- To understand visual hierarchy and information organization.
- To design intuitive and user-friendly interfaces.
- To understand website and mobile application layouts.
- To create low-fidelity website wireframes.
- To analyze user flows and navigation patterns.
- To identify usability problems in existing interfaces.
- To develop effective landing-page designs.
- To improve skills in typography, spacing, color, and visual consistency.
- To understand the importance of iterative design and usability improvement.

4.5 Scope of the Project

The scope of the internship covered different stages of the UI/UX design process.

The work included analyzing existing interfaces, planning layouts, creating wireframes, designing website and mobile interfaces, studying user flows, identifying usability problems, and developing visually consistent designs.

The internship covered the following major areas:

UI Design

- Website interface design
- Mobile application interface design
- Landing-page design
- Visual hierarchy
- Typography
- Color and contrast
- Layout and spacing

UX Design

- User-flow analysis
- Navigation analysis
- Usability evaluation
- Problem identification

- UX improvement suggestions

Design Planning

- Wireframing
- Content organization
- Page structure
- Interaction planning

The internship was primarily focused on **design and user experience**, rather than software development or coding.

4.6 Technologies and Tools Used

Primary Design Tool:

Figma

Figma was used for creating interface designs, wireframes, layouts, and visual prototypes.

UI/UX Concepts

- User Interface Design
- User Experience Design
- Wireframing
- User Flow
- Visual Hierarchy
- Typography
- Color Theory
- Contrast
- Layout Design
- Spacing
- Responsive Design
- Usability Analysis
- Interaction Design

Design Process

The overall design process followed:

Research → Analysis → Wireframing → UI Design → Review → Improvement → Final Design

4.7 Internship Tasks

Task 1 — Website UI Redesign

Objective

The objective was to analyze an existing simple website and redesign its interface to improve its clarity, structure, navigation, and visual appeal.

Work Performed

- Analyzed the existing website interface.
- Identified layout and visual hierarchy issues.
- Examined navigation and content organization.
- Improved spacing and alignment.
- Improved typography and visual hierarchy.
- Organized content into clearer sections.
- Created a cleaner and more user-friendly interface.
- Applied consistent UI design principles.

Outcome

The task helped develop an understanding of how an existing interface can be evaluated and improved without changing its fundamental purpose.

Task 2 — Mobile App Interface Design

Objective

The objective was to design a modern mobile application interface with an intuitive layout and user interaction flow using Figma.

Work Performed

- Planned the mobile application layout.
- Designed individual mobile screens.
- Organized navigation elements.
- Applied consistent spacing.
- Used appropriate typography and visual hierarchy.
- Maintained consistency across screens.
- Considered user interaction and navigation flow.
- Created the interface using Figma.

Outcome

This task improved my understanding of mobile-first interface design and demonstrated the importance of consistency and usability across multiple application screens.

Task 3 — Website Wireframing

Objective

The objective was to create wireframes that define the basic structure and layout of a website before applying final visual styling.

Work Performed

- Planned the overall website structure.
- Organized navigation elements.
- Determined the placement of text and images.
- Planned buttons and content sections.
- Created low-fidelity wireframes.
- Focused on information hierarchy.
- Used wireframes to establish the basic page structure.

Outcome

The task demonstrated how wireframing can be used to identify structural problems and plan an interface before investing time in detailed visual design.

Task 4 — UX Case Study Analysis

Objective

The objective was to evaluate an existing website or mobile application and identify usability issues and opportunities for UX improvement.

Analysis Areas

- User flow
- Navigation
- Information organization
- Interaction patterns
- Usability
- Visual hierarchy
- Accessibility considerations
- Overall user experience

Work Performed

The interface was evaluated from a user's perspective to identify areas that could make navigation or interaction difficult. Based on the analysis, possible improvements were proposed to simplify the user journey and improve usability.

Outcome

This task helped me understand that effective UX design requires more than visual appearance. A successful interface should also make it easy for users to understand, navigate, and complete their intended tasks.

Task 5 — Landing Page Design

Objective

The objective was to create a visually engaging and effective landing page for a product or service using Figma.

Work Performed

- Designed the hero section.
- Organized information hierarchy.
- Planned clear call-to-action placement.
- Applied consistent typography.
- Used appropriate spacing and alignment.
- Maintained visual consistency.
- Designed supporting content sections.
- Considered responsive layout requirements.

Outcome

The task improved my ability to combine visual design with business-oriented communication, ensuring that important information and calls-to-action are easy for users to identify.

4.8 Methodology

The internship followed a practical and iterative UI/UX design methodology..

Phase 1 — Understanding the Requirement

The first step was to understand the objective and requirements of each assigned task.

Phase 2 — Analysis

Existing interfaces, layouts, navigation patterns, and usability aspects were analyzed wherever required.

Phase 3 — Planning

The structure and information hierarchy were planned before creating the final design.

Phase 4 — Wireframing

Wireframes were used to establish the basic layout and placement of major interface elements.

Phase 5 — UI Design

Visual elements such as typography, spacing, colors, buttons, cards, and other components were incorporated into the interface.

Phase 6 — Review

The designs were reviewed to identify inconsistencies, usability issues, and visual problems.

Phase 7 — Improvement

Based on the review, layouts and visual elements were refined to improve the overall user experience.

Phase 8 — Final Design

The final interface was organized and presented as the completed design solution.

4.9 Expected Outcomes

- The internship helped me develop practical knowledge in several areas of UI/UX design.
- **Technical / Design Skills**
- Practical experience with Figma.
- Creating website layouts.
- Designing mobile interfaces.
- Creating website wireframes.

- Understanding user flows.
- Applying visual hierarchy.
- Working with typography and spacing.
- Applying color and contrast principles.
- Designing landing pages.
- Evaluating usability.

Professional Skills

- Understanding design requirements.
- Problem-solving through design.
- Attention to detail.
- Iterative improvement.
- Organizing design work.
- Presenting design decisions.
- Working independently on assigned tasks.

4.10 Certificates of Completion and Communication Proof

The Internship Offer Letter and the Internship Completion Certificate issued by Virtual Works, confirming successful completion of the 1 month Virtual Internship Program in Virtual Works, are attached in Chapter 3 of this report.

PERFORMANCE EVALUATION REPORT

Official Transcript & Assessment

I. INTERNSHIP DETAILS

Intern Name: **Chaitanyajain**
Internship ID: **VWX-AUG26TOSEP26-571**
Domain: **UI/UX**
Duration: **from 30/07/2026 to 29/08/2026**
Total Hours: **153 Hours**

II. EVALUATION MATRIX

Assessment Criteria	Score (Out of 100)
Technical Competence & Skills	97
Task Completion & Timeliness	96
Problem Solving & Logic	93
Communication & Documentation	94
Consistency & Effort	98

FINAL SCORE: **95/100**
OVERALL GRADE: **A (Excellent)**

III. PROJECT / TASK RECORD

Project Title / Task Description	Grade	Authentic Proof URL
Landing Page Design	A	https://github.com/chaitanyajatwork-sys/spendly-land...
UX Case Study Analysis	A	https://github.com/chaitanyajatwork-sys/campusconnec...
Website Wireframing	A	https://github.com/chaitanyajatwork-sys/northstar-we...
Mobile App Interface Design	A	https://github.com/chaitanyajatwork-sys/studyflow-mo...
Website UI Redesign	A	https://github.com/chaitanyajatwork-sys/northstar-ui...

IV. MENTOR REMARKS

"The intern demonstrated an exceptional ability to grasp complex concepts rapidly and deliver high-quality code. Their problem-solving skills and attention to detail reflect a high level of professional competence."

EVALUATED BY:

Ankit S. Verma
Program Evaluator & CHRO
